

COLUMBIA ParCar ARIZONA Battery Maintenance

Battery Maintenance

1. Check Fluid Level every month in winter and every 2 weeks in the summer.
2. Fill $\frac{1}{4}$ " below cell skirts with distilled water after charging.
3. Put on Charge at the end of **EACH** day regardless of distance driven.
4. Make sure charger has a green light before unplugging charger each morning. If charger fails to display a green light or does not turn off contact Columbia ParCar Arizona immediately.
5. Once per quarter (every 90 days) apply a baking soda and water solution to the batteries. Mix 1 cup baking soda with 1 gallon water and spray or pour liberally over batteries and allow a few minutes to neutralize acid corrosion. Rinse off solution with clean water. Acid will damage most garage floors, driveways and streets, perform rinse over rocks or other less damagable surface.
